## Distribución de productos provenientes de donativos

Los módulos alimenticios contienen arroz, pastas, granos y azúcar

Debido a que no es posible homologar para todos los núcleos y por igual, determinadas provincias se verán beneficiadas, de forma inmediata, con otros productos que llegan al país por donación

Se entregará un módulo por núcleo, a todas las familias cubanas, de manera paulatina

Las provincias que los recibirán primero son: La Habana, Matanzas, Ciego de Ávila, Santiago de Cuba, Holguín, Guantánamo y la Isla de la Juventud

A estos productos accederán todos los núcleos, incluidos aquellos que tienen libretas excepcionales, cuyo otorgamiento corresponde al periodo del 19 al 31 de julio.

El cronograma de distribución inicia el día 30 de julio en la capital

Progresivamente, se irá extendiendo la distribución hasta el 15 de agosto

La Ministra del Comercio Interior, Betsy Díaz Velázquez desmintió los rumores en redes sociales, que alegan falsamente que estos surtidos se venderán en mercados en MLC.

#LoDiceGranma | Granma

Based on the donations that have arrived in the country, from friendly countries, a distribution mechanism has been designed in the Commerce system, with the purpose of benefiting, in the shortest possible time, the largest number of provinces, although with different inputs.

The Minister of Internal Trade, Betsy Díaz Velázquez clarified that to give a pound of any assortment, 5,200 tons are needed, so that it reaches everyone equally. Consequently, it was decided "that any product that, due to its structure, quantity and packaging, allows us to distribute it by core or by core composition, will be made that way."

He said that the country has also received raw materials, such as wheat flour, whose delivery destination will be, fundamentally, to the local production industry, to increase the output of bread and biscuits. "These foods will have a minimal cost in marketing to the population, since they are incorporated, in their preparation, other

---

inputs that are not donated."

FOOD MODULES AND OTHER PRODUCTS THAT WILL BE DELIVERED FREE OF CHARGE

The Minister of Internal Trade explained that, based on the existence in volumes of a certain group of products, food modules have been formed with rice, pasta, grains and sugar, which will be delivered at a rate of one per core, to all Cuban families, gradually.

The provinces that will receive them first are: Havana, Matanzas, Ciego de Ávila, Santiago de Cuba, Holguín, Guantánamo and the special municipality of Isla de la Juventud, with a distribution schedule that begins on July 30 in the capital, and that, progressively, will be extended until August 15.

These products - he continued - will be accessed by all nuclei, including those that have exceptional notebooks, the granting of which corresponds to the period from July 19 to 31.

On the other hand, and taking into account that it is not possible to homologate for all the nuclei and equally, other products that arrive in the country by donation, certain provinces will benefit, immediately, with food that is already on Cuban soil.

For example, he mentioned, the provincial capital of Pinar del Río will receive canned meat; the province of Cienfuegos, as of next day 30, one liter of oil per kernel; and the eastern zone - from Las Tunas to Guantánamo - will benefit from cans of tuna, depending on the composition of the nucleus.

Starting next week, Villa Clara, Camagüey, Mayabeque and Las Tunas will receive beans; Artemisa and Ciego de Ávila, oil; while in Havana powdered milk will be distributed to those over 65 years of age. On the other hand, he pointed out, several provinces will be receiving wheat flour as raw material.

None of these products, he clarified, replaces the regulated family basket, and its validity in the winery is 30 days.

Díaz Velázquez emphasized that the food received by donation is delivered free to the population, and the expenses incurred by the companies for the transportation and storage operations are assumed by the State Budget.

A few days ago the advance sale of the family basket regulated for August was announced, a process that could be fulfilled in 98% of the country's municipalities, while the territories that were pending have

## **Announce distribution of food products, from donations, in the network of wineries**

been incorporated into the distribution in the last hours. Thanks to the efforts of transporters and national production, it has been possible to guarantee the sale of rice, which is one of the products in greatest demand, and in addition to the seven pounds per capita that are delivered in a controlled manner by the supply book, In several municipalities - more than 70% - the three additional pounds that would be marketed in August are already available.

He added that consumers will continue to receive this additional rice until December, in the more than 12,000 warehouses in the country, and argued that such assurance is the result of the income obtained in the stores in freely convertible currency (MLC).
